16 A

You can choose between 26 different colours and various materials such as wood, glass, and plastic. There is a wide range of possible combinations of cover plates and buttons. Upon order we can also completely personify it with a laser engraving and you can also order your own custom colour.

In order to simplify the selection from our design lines, you can use the MODUL MANAGER configurator to easily simulate any colour combinations of cover plates, switches and technical solutions, as well as check combinations and prices from the comfort of your home before making a purchase.

We offer a wide range of technical solutions to regulate light, temperatures, sensors, mini lamps, identification solutions for orientation in the dark, and blinds... in short, solutions that ensure comfortable living.
